

HAUG Ionization - System X-2000

System X-2000

The first coaxial plug-and-socket connector for do-it-yourself mounting.

Reliable HAUG quality for good:

This generation of plug offers some great advantages:

 **SYSTEM X-2000**

Advantages of the HAUG technology

High-voltage plugs

- Easily exchangeable
- Gas-tight
- Prevention of electric shocks due to projected earthing
- Mechanical strain relief on plug
- Fitting to all power packs (back to 1978)

Bars / cables

- Fully screened cables
- Cable and bar detachable
- Bars are connectable in row by different cable types
- All bar/cable combinations possible
- Bars safe to be touched
- No jut out pins
- Bars easily to install
- Various bar types with different power available
- Bars easy to clean
- Symmetric discharge impact

Powerpacks

- Protection type IP 54
- All parts exchangeable
- Power packs with/without monitoring available
- Connection of bars without opening the unit
- Up to 8 high-voltage connections
- No exposed high-voltage in the unit

Save costs

- Smallest drill holes of cable ducts for mounting -> low mounting costs
- On the spot repair and shortening of defective cables -> standstill times of machines are reduced decisively
- Exchange of plugs without removal of units -> time and costs reduction

Short term deliveries

- Standard cable lengths shorten the delivery term efficiently. The customer shortens the cable to his needs
- No transport of defective cables
- Possibility of warehousing plugs/parts at the customer or representative's place
- If warehousing is kept, pre-mounting at the customer's is possible
- Delivery terms can be shortened due to pre-mounting

Service

- Mountable and demountable plugs, i.e. cables can be adjusted uncomplicatedly as needed
- Defective cables can be replaced on the spot
- Short standstill times of machines due to defective cables can be reduced considerably using the HAUG System X-2000
